Design Document: Automated Employee Probation Evaluation

- **CR:** CR-2026-XXX-PEV · **Version:** 0.4 DRAFT (Solution Architect approval pending)
- **Based on:** CR v0.7 and SRS v0.6. **Warning:** the SRS is not yet approved, so this design may change.
- **Schema checked against:** HRD, DEFINITIONS, HIS and PAYROLL DDL exports, including package bodies. APEX applications were not in the export.
- **Approach:** dedicated probation tables plus one new package. Existing HRD objects are reused where they already fit.
- **Changed in v0.4 (HR/IT answers):**
 - All departments will have a probation hierarchy. The fallback is the **generic** leave hierarchy (not leave-type specific).
 - A Return goes back **only to the approver who returned it**.
 - An extension is recorded as a **new probation-history row with status 'E'**.
 - Notifications use the existing **alerts** framework.
 - Alert 001 and S07FRM00362 stay **unchanged**.
- **Changed in v0.3:** approval routing uses the department's probation hierarchy if one is set up. Otherwise it uses the **organizational leave hierarchy** already in HRD, the same rules as `HRD.LEAVE_AUTOMATION.GET_AUTHORITY (RULE-14)`.
- **Changed in v0.2:** the evaluation form has four tabs: **Evaluation Criteria | Assignments | Training Needs | Recommendation**.
 - Standard criteria rated 1–5.
 - Assignments completed during probation, each rated 1–5.
 - The employee's assessed training needs.
 - Specific reasons and observations, with evidence, when the employee is not recommended for confirmation.

The form has no Approval History or Finalization tabs: approval history is on the approval and monitoring pages, and HR finalization is its own page. Evidence is stored in the existing `HRD.EMPLOYEE_PROBATION_ATTACHMENT`.

1. Design Summary

- A **daily job** finds employees whose probation ends within 15 days (a setting, default 15) and creates an evaluation for each one's supervisor. This **replaces the Excel form** sent with the probation-ending alert.
- The **supervisor** fills in four tabs, then saves as Draft or submits:
 - **Evaluation Criteria:** standard parameters, each rated 1–5;
 - **Assignments** completed during probation, each rated 1–5;
 - **Training Needs;**
 - **Recommendation.** If the recommendation is Extend or Not to Confirm, the **reasons, observations and evidence** are mandatory.

- On Submit, the evaluation goes through the **approval levels set up for the department**. If none are set up, it goes through the **organizational leave hierarchy**. Each approver can approve it or return it.
- After the last approval it goes to **HR**, who finalize it as Confirm or Extend. Only at this step is the existing probation record updated.
- **Every status change is logged**. HR can see every evaluation on a monitoring screen.

2. Key Design Decisions

- **DS-D1 Dedicated tables, not the PA appraisal engine**. The VU_PA_* views and PKG_PERFORMANCE_APPRAISAL are not affected.
- **DS-D2 Workflow status kept in the new table, not in `EMPLOYEE\_PROBATION\_HISTORY.PROBATION\_STATUS`**. Writing 'C' to that column fires three triggers:
 - EMP_INCENTIVE_QUEUE, which creates incentive/allowance queue entries;
 - EMP_PROBATION_HISTORY_INFO_UPD, which sets INFORMATION.CONFIRMATION_DATE;
 - TR_PROBATION_EXPIRE_QUEUE_DEL, which clears alert 001.

So 'C' is written **only at HR finalize**.

- **DS-D3 All logic lives in `HRD.PKG\_PROBATION\_EVALUATION`**. APEX pages only call package procedures.
- **DS-D4 Queues use the existing pending-task framework**: a new procedure in HRD.PKG_PENDING_TASKS, registered in HIS.USER_ASSIGNMENT.
- **DS-D5 Optimistic locking**: a VERSION_N0 column on the header (error -20802 on a mismatch).
- **DS-D6 Approver on leave**: the approval goes to the acting-for person from HRD.ACTING_FOR.
- **DS-D10 Routing fallback to the leave hierarchy (RULE-14)**:
 - The **probation hierarchy** applies when the department has active rows in HRD_PROBATION_HIERARCHY_MST.
 - Otherwise the **leave hierarchy** applies. It is resolved read-only, the way HRD.LEAVE_AUTOMATION.GET_AUTHORITY does it:
 1. **Generic organizational leave hierarchy** (the same for all leave types, per HR): the employee's reporting chain from INFORMATION.MANAGER_MRNO upwards, starting above the evaluator. The levels vary by employee (e.g. supervisor → HOD → manager → director). The chain stops at the final approver, using the same Approve authority used for leave (INFORMATION.LEAVE_ROLE_ID → ROLE_AUTHORITY.LEAVE_AUTHORITY_ID = '002'). Safety limit: 6 levels; cycles are detected.
 2. Department rows in HRD.LEAVE_QUEUE_HIERARCHY are used where they exist, in ORDER_BY order (doctor/admin type from HIS.PKG_DOCTOR.IS_DOCTOR).
 3. After the last approver, the evaluation goes to HR.

- The route is resolved **once at Submit** and stored as APPROVAL_TRN rows, so later hierarchy changes don't move evaluations already in progress.
- The source is recorded in EVAL_MST.ROUTE_SOURCE: PH = probation hierarchy, LQH = department leave hierarchy rows, SUP = generic reporting chain.
- Leave processing itself is not changed or called; only its setup tables are read.
- **DS-D7 Evidence reuses the existing `HRD.EMPLOYEE\_PROBATION\_ATTACHMENT`**. It is keyed by MRNO + probation START_DATE, and no existing package writes to it.
- **DS-D8 Scores are calculated (RULE-13):**
 - total = (number of criteria + number of assignments) × 5;
 - obtained = sum of all ratings;
 - performance % = obtained ÷ total × 100.

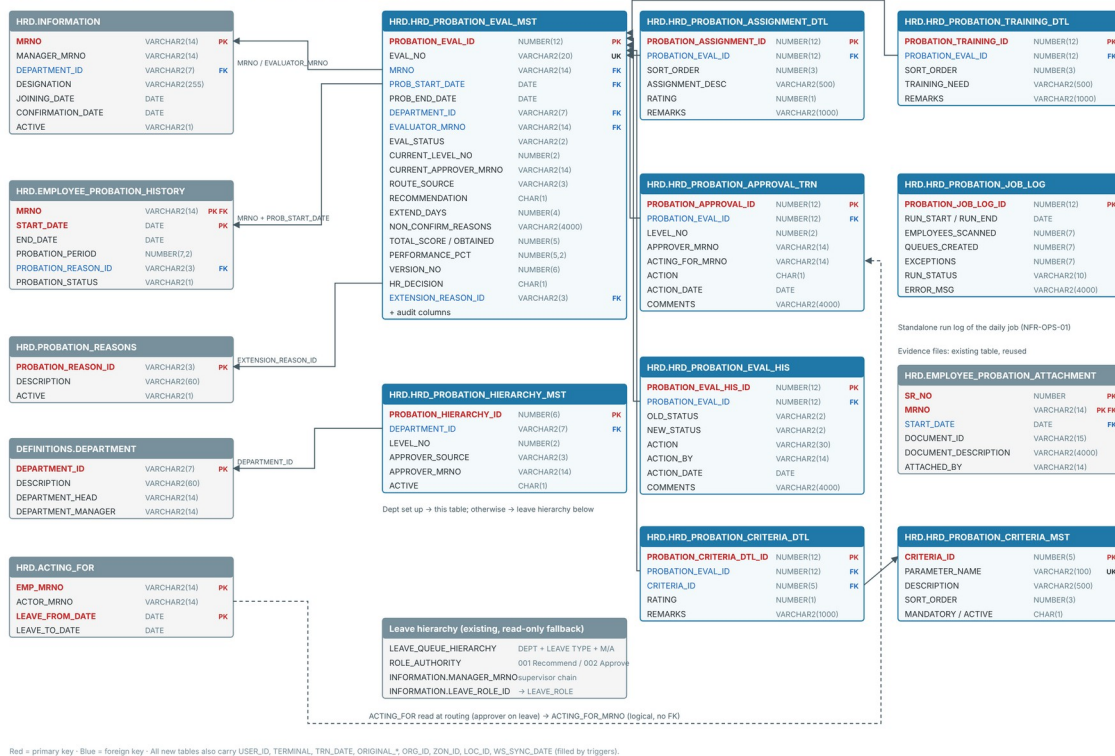

Each tab also shows its own section score.

- **DS-D9 Existing process stays unchanged (per HR):** alert 001 (probation-ending alert with the Excel form) and form S07FRM00362 are not modified. The new workflow runs alongside them.

3. DB Structure

Probation Evaluation – ER Diagram (DB Structure)

CR-2026-XXX-PEV - blue = NEW tables (proposed) - grey = existing HRD / DEFINITIONS tables (verified in schema) - arrow points to parent (1 → N)

New tables. All follow the HRD audit-column pattern (USER_ID, TERMINAL, TRN_DATE, ORIGINAL_*, ORG_ID/ZON_ID/LOC_ID), filled by triggers.

- **DS-01 `HRD.HRD\_PROBATION\_EVAL\_MST`:** evaluation header, one row per evaluation.
 - **Keys:**
 - PROBATION_EVAL_ID NUMBER(12) is the PK.
 - EVAL_NO VARCHAR2(20) is unique, in the form PEV-YYYY-NNNNNN.
 - MRNO VARCHAR2(14) + PROB_START_DATE is an FK to EMPLOYEE_PROBATION_HISTORY.
 - **Who and where:** PROB_END_DATE, DEPARTMENT_ID VARCHAR2(7), EVALUATOR_MRNO (NULL = HR exception list).
 - **Workflow:** EVAL_STATUS VARCHAR2(2) (EP / DR / PA / RT / FH / CM / CN), CURRENT_LEVEL_NO, CURRENT_APPROVER_MRNO, **`ROUTE\_SOURCE`** VARCHAR2(3) (PH / LQH / SUP).
 - **Evaluation:**
 - RECOMMENDATION (C = Confirm / E = Extend / N = Not to confirm) and EXTEND_DAYS.
 - **`NON\_CONFIRM\_REASONS` VARCHAR2(4000)**, the specific reasons and observations. Required once submitted when the recommendation is E or N (check constraint CK_PROB_EVAL_REASONS).
 - TOTAL_SCORE, OBTAINED_SCORE, PERFORMANCE_PCT, and SUBMITTED_DATE.
 - **HR decision:** HR_DECISION (C / E / O), HR_EXTEND_DAYS, EXTENSION_REASON_ID (FK to PROBATION_REASONS), HR_DECISION_BY, HR_DECISION_DATE, HR_REMARKS.
 - **Control:** EXCEPTION_REASON, and VERSION_NO for locking.
 - **One active evaluation per probation period** is enforced by the unique index IDX_PROB_EVAL_ACTIVE_UK, which ignores cancelled rows.
- **DS-02a `HRD.HRD\_PROBATION\_CRITERIA\_MST`:** standard evaluation criteria that HR maintains.
 - Columns: CRITERIA_ID, PARAMETER_NAME VARCHAR2(100), DESCRIPTION VARCHAR2(500), SORT_ORDER, MANDATORY Y/N, ACTIVE Y/N.
 - The existing EVALUATION_CRITERIA_MASTER is too limited to reuse: its description is only VARCHAR2(55).
- **DS-02b `HRD.HRD\_PROBATION\_CRITERIA\_DTL`:** one rating per criterion per evaluation.
 - Columns: PROBATION_EVAL_ID, CRITERIA_ID, RATING (1-5), REMARKS.
 - Unique on (evaluation, criterion). One row per active criterion is created when the evaluation is created.
- **DS-02 `HRD.HRD\_PROBATION\_ASSIGNMENT\_DTL`:** assignments completed during the probationary period.
 - Columns: PROBATION_ASSIGNMENT_ID, PROBATION_EVAL_ID, SORT_ORDER, ASSIGNMENT_DESC VARCHAR2(500), RATING NUMBER(1) (1-5), REMARKS VARCHAR2(1000).
- **DS-03 `HRD.HRD\_PROBATION\_TRAINING\_DTL`:** the employee's assessed training needs.

- Columns: PROBATION_TRAINING_ID, PROBATION_EVAL_ID, SORT_ORDER, TRAINING_NEED VARCHAR2(500), REMARKS VARCHAR2(1000).
- Free text: the training subject master is in the TRAINING schema, which is not in the export. Linking to it is a later option (Q-28).
- **DS-04 `HRD.HRD\_PROBATION\_HIERARCHY\_MST`**: approval levels.
 - Columns: DEPARTMENT_ID (**mandatory**; departments without rows use the leave hierarchy), LEVEL_NO, APPROVER_SOURCE, APPROVER_MRNO, ACTIVE. Unique on (department, level).
 - APPROVER_SOURCE is SUP (the employee's supervisor), DH (department head), DM (department manager) or EMP (a named employee, e.g. a director).
- **DS-05 `HRD.HRD\_PROBATION\_APPROVAL\_TRN`**: one row per level per evaluation.
 - Columns: LEVEL_NO, APPROVER_MRNO, ACTING_FOR_MRNO, ACTION, ACTION_DATE, COMMENTS.
 - ACTION is P (pending), A (approved), R (returned) or S (skipped). Comments are mandatory on Return.
- **DS-06 `HRD.HRD\_PROBATION\_EVAL\_HIS`**: status history.
 - Columns: OLD_STATUS, NEW_STATUS, ACTION, ACTION_BY, ACTION_DATE, COMMENTS.
 - Insert-only: trigger TRG_PROBATION_EVAL_HIS_BUD blocks updates and deletes.
- **DS-07 `HRD.HRD\_PROBATION\_JOB\_LOG`**: daily job log.
 - Columns: RUN_START, RUN_END, EMPLOYEES_SCANNED, QUEUES_CREATED, EXCEPTIONS, CANCELLED, RUN_STATUS, ERROR_MSG.
- **DS-08 Supporting objects:**
 - 9 sequences (PROBATION_*_SEQ).
 - Indexes on every FK and on the main searches: status, evaluator, approver, end date.
 - Audit triggers TRG_<TABLE>_BI / _BU, following the existing EMPLOYEE_PROBATION_HISTORY_INS pattern.

Existing objects used.

- **Read:**
 - HRD.INFORMATION: MRNO, MANAGER_MRNO (evaluator), DEPARTMENT_ID, ACTIVE H/Y/N.
 - DEFINITIONS.DEPARTMENT: DEPARTMENT_HEAD, DEPARTMENT_MANAGER.
 - HRD.ACTING_FOR.
 - HRD.PROBATION_REASONS.
 - HRD.F_PROBATION_END_DATE, which returns MAX(END_DATE).
 - **Leave hierarchy, for the fallback (RULE-14), code-verified in `LEAVE\_AUTOMATION`:**

- HRD.LEAVE_QUEUE_HIERARCHY (DEPARTMENT_ID, LEAVE_TYPE_ID, HIERARCHY_TYPE, ORDER_BY, MRNO, ACTIVE);
 - HRD.ROLE_AUTHORITY (LEAVE_ROLE_ID, LEAVE_TYPE_ID, LEAVE_AUTHORY_ID);
 - HRD.LEAVE_ROLE;
 - HRD.INFORMATION.LEAVE_ROLE_ID / MANAGER_MRNO;
 - HIS.PKG_DOCTOR.IS_DOCTOR and HRD.F_GET_DEPARTMENT_ID.
- **Evidence written to `HRD.EMPLOYEE\_PROBATION\_ATTACHMENT`:**
 - Columns used: SR_NO, MRNO, START_DATE = PROB_START_DATE, DOCUMENT_ID VARCHAR2(15), DOCUMENT_DESCRIPTION, ATTACHED_BY, DOCUMENT_TYPE_ID.
 - SR_NO = MAX + 1 per MRNO, under a row lock on the evaluation header.
 - The file itself goes to the existing document store, which is referenced by DOCUMENT_ID (the same pattern as V_HR_EMP_DOCUMENTS).
 - **Written at HR finalize only:** HRD.EMPLOYEE_PROBATION_HISTORY.
 - Confirm sets PROBATION_STATUS = 'C'.
 - Extend sets a new END_DATE and PROBATION_REASON_ID, with PROBATION_STATUS staying 'P'.
 - **Seed data:** HIS.USER_ASSIGNMENT (pending-task registration), HRD.ALERTS / ALERT_RECIPIENTS (notification set-up).

Data migration: none. An optional backlog run at go-live creates evaluations for employees who are already within 15 days of their probation end date.

4. Technical Details: Package HRD.PKG_PROBATION_EVALUATION (NEW)

All procedures use %TYPE parameters. The **caller commits** (an APEX page process or the job).

- **`P\_GENERATE\_EVAL\_QUEUE(P\_RUN\_DATE IN DATE DEFAULT TRUNC(SYSDATE))`:** the daily job. FR-001 to FR-005.
 1. Write a log row (RUNNING).
 2. Do a set-based insert into EVAL_MST for active employees on probation where:
 - F_PROBATION_END_DATE (MRNO) is between P_RUN_DATE and P_RUN_DATE + lead days (default 15);
 - and there is no non-cancelled evaluation for that MRNO and probation start date.

This also catches up on missed days.

3. Set the evaluator from INFORMATION.MANAGER_MRNO. If it is NULL, set EXCEPTION_REASON = 'Supervisor not defined'.
4. Insert one CRITERIA_DTL row per active criterion, and a history row (action CREATED).

5. Cancel open evaluations (status EP/DR/PA/RT) for employees whose INFORMATION.ACTIVE <> 'Y'.
 6. Queue the notification e-mails, update the log to SUCCESS with counts, and commit. On error: roll back, log FAILED and re-raise.
- **`P\_SAVE\_DRAFT(P\_PROBATION\_EVAL\_ID, P\_VERSION\_NO, P\_RECOMMENDATION, P\_EXTEND\_DAYS, P\_NON\_CONFIRM\_REASONS)`**. FR-008.
 - The caller must be the evaluator, and the status must be EP, DR or RT.
 - Sets status DR and writes history. Mandatory fields are not checked.
 - **`P\_SAVE\_CRITERIA\_RATING(P\_PROBATION\_EVAL\_ID, P\_CRITERIA\_ID, P\_RATING, P\_REMARKS)`**. FR-024.
 - Updates the rating and recalculates the scores (RULE-13).
 - **`P\_SAVE\_ASSIGNMENT(P\_PROBATION\_EVAL\_ID, P\_PROBATION\_ASSIGNMENT\_ID, P\_ASSIGNMENT\_DESC, P\_RATING, P\_REMARKS)`** and **`P\_DELETE\_ASSIGNMENT(P\_PROBATION\_ASSIGNMENT\_ID)`**. FR-021.
 - Insert when the ID is NULL, otherwise update.
 - Recalculates TOTAL_SCORE, OBTAINED_SCORE and PERFORMANCE_PCT (RULE-13).
 - **`P\_SAVE\_TRAINING\_NEED(P\_PROBATION\_EVAL\_ID, P\_PROBATION\_TRAINING\_ID, P\_TRAINING\_NEED, P\_REMARKS)`** and **`P\_DELETE\_TRAINING\_NEED(P\_PROBATION\_TRAINING\_ID)`**. FR-022.
 - **`P\_ADD\_EVIDENCE(P\_PROBATION\_EVAL\_ID, P\_DOCUMENT\_ID, P\_DESCRIPTION)`** and **`P\_REMOVE\_EVIDENCE(P\_PROBATION\_EVAL\_ID, P\_SR\_NO)`**. FR-023.
 - Insert or delete the row in HRD.EMPLOYEE_PROBATION_ATTACHMENT for the evaluation's MRNO + PROB_START_DATE, with ATTACHED_BY = the user.
 - Allowed only while the evaluation is editable (EP, DR or RT).
 - **`P\_SUBMIT(P\_PROBATION\_EVAL\_ID, P\_VERSION\_NO)`**. FR-009, FR-010, FR-011, FR-021, FR-023, FR-024, RULE-12.
 7. Check every mandatory criterion is rated, otherwise -20801. Check there is at least one assignment, otherwise -20807.
 8. Check every assignment is rated, otherwise -20801.
 9. Check a recommendation is set, and that Extend has its days, otherwise -20805.
 10. If the recommendation is E or N, check NON_CONFIRM_REASONS is filled and at least one evidence row exists, otherwise -20806.
 11. **First submit:** set SUBMITTED_DATE, call P_BUILD_ROUTE, then call P_ROUTE(level 1). **Re-submit after a Return:** reopen the returned level's row (ACTION = 'P') and route to that same approver.
 - **`P\_BUILD\_ROUTE(P\_PROBATION\_EVAL\_ID)`** (internal, called by P_SUBMIT). FR-011, RULE-14.

12. Delete any pending (P) route rows left from an earlier submit.
 13. If the department has active HIERARCHY_MST rows, resolve each level from DH / DM / EMP and set ROUTE_SOURCE = 'PH'.
 14. Otherwise call F_GET_LEAVE_ROUTE and set the source to LQH or SUP.
 15. Insert one APPROVAL_TRN row per level with ACTION = 'P'.
 16. If no approver is found at all, place the evaluation on the HR exception list ("No approval hierarchy found").
- **F_GET_LEAVE_ROUTE(P_MRNO, P_EVALUATOR_MRNO, P_ROUTE_SOURCE OUT) RETURN T_APPROVER_LIST** (internal, read-only). RULE-14.
 - Generic leave hierarchy (not filtered by leave type): department rows in LEAVE_QUEUE_HIERARCHY if present, otherwise the reporting chain upwards from the evaluator's manager to the final Approve authority (ROLE_AUTHORITY.LEAVE_AUTHORITY_ID = '002'). Maximum 6 levels; cycles are detected.
 - **P_ROUTE(P_PROBATION_EVAL_ID, P_LEVEL_NO)** (internal). FR-011, FR-014, RULE-09.
 17. Read the next pending APPROVAL_TRN row (built by P_BUILD_ROUTE).
 18. Use its approver.
 19. If that approver is on leave, use the HRD.ACTING_FOR actor.
 20. If the approver is the evaluator or the employee, insert an S (skipped) row and move to the next level.
 21. If the approver cannot be resolved, place the evaluation on the HR exception list.
 22. If there is no next level, set status FH (Forwarded to HR).
 23. Otherwise set status PA, CURRENT_LEVEL_NO and CURRENT_APPROVER_MRNO, and insert an APPROVAL_TRN row with action P.
 - **P_APPROVE(P_PROBATION_EVAL_ID, P_VERSION_NO, P_COMMENTS)**. FR-012.
 - The caller must be the current approver or the acting-for person.
 - Marks the level A, then calls P_ROUTE(level + 1).
 - **P_RETURN(P_PROBATION_EVAL_ID, P_VERSION_NO, P_COMMENTS)**. FR-013.
 - Comments are mandatory (-20803).
 - Marks the level R and sets status RT, and stores the returning level in CURRENT_LEVEL_NO.
 - **On re-submit, P_SUBMIT routes straight back to that level.** Earlier A rows are kept; P_BUILD_ROUTE is not re-run.
 - **P_ASSIGN_EVALUATOR(P_PROBATION_EVAL_ID, P_EVALUATOR_MRNO)**: HR Administrator only. FR-005, FR-006.
 - **P_HR_FINALIZE(P_PROBATION_EVAL_ID, P_VERSION_NO, P_HR_DECISION, P_HR_EXTEND_DAYS, P_EXTENSION_REASON_ID, P_HR_REMARKS)**: HR role only, and the status must be FH. FR-015, FR-016, RULE-11.

- **C (Confirm):** PROBATION_STATUS = 'C' on the probation record. The existing triggers then set the confirmation date, queue incentives and clear alert 001.
- **E (Extend):** insert a new `EMPLOYEE\_PROBATION\_HISTORY` row, the same way probation history is recorded today:
 - START_DATE = current END_DATE + 1;
 - END_DATE = START_DATE + days - 1;
 - PROBATION_PERIOD = days;
 - PROBATION_REASON_ID = the chosen reason;
 - `PROBATION\_STATUS = 'E'` (the existing Extended code, which PKG_COMMON, LEAVE_AUTOMATION and others treat as still on probation).

The current row is not changed. F_PROBATION_END_DATE (MAX(END_DATE)) then returns the new end date, so the daily job creates the next evaluation 15 days before it.

- **O (Other):** no change to the probation record.
- In all cases: set status CM and write history.
- `P\_LOG\_STATUS(...)` (internal): inserts the EVAL_HIS row on every status change.
- `F\_IS\_OVERDUE(P\_PROBATION\_EVAL\_ID) RETURN CHAR`: FR-020.
- **Error codes:**

Code	Meaning
-20800	Not authorised
-20801	Unrated criterion or assignment, or mandatory field missing
-20802	Record changed by another user, reload
-20803	Comments required for Return
-20804	Invalid status for this action
-20805	Recommendation, or extension days/reason, missing
-20806	Reasons, observations and evidence are required when not recommended for confirmation
-20807	At least one assignment is required

Modified package `HRD.PKG\_PENDING\_TASKS`:

- Add P_PROBATION_EVAL_QUEUE, with the standard signature (P_USER_MRNO, P_ACTING_FOR, P_OBJECT_CODE, P_PROCESS_ID, P_TERMINAL, P_EVENT, P_ASSIGNMENT_ID).
- It inserts the user's item count into HIS.TMP_USER_ASSIGNMENT_VAL. The items counted are:
 - as evaluator: status EP, DR or RT;
 - as current approver: status PA;
 - as HR: status FH.
- Register it with one row in HIS.USER_ASSIGNMENT.

5. GUI Pages (APEX, SKMCH GUI template)

The application ID and page numbers are to be confirmed. Page code S07APX0XXXX is a placeholder. Static IDs follow HRD standards (REG_, P<n>_, BTN_, DA_, LOV_).

- **Page A: My Pending Tasks.** This is the existing inbox, and it lists the new task type. A row click opens Page B.

My Pending Tasks Probation Evaluation EMP-TEST-0100 Nadia Khan

- **Page D: Probation Approval Hierarchy Setup (NEW).** Interactive Grid on HRD_PROBATION_HIERARCHY_MST; the department is mandatory. A note explains that departments without rows follow the organizational leave hierarchy. **Authorization:** HR Administrator.

Probation Approval Hierarchy Setup S07APX0XXXX

Levels are applied in order on Submit. Departments without a probation hierarchy here follow the organizational leave hierarchy already defined in the system (generic reporting chain, e.g. supervisor → HOD → manager → director, then HR). Approver on leave → acting-for person (HRD.ACTING_FOR).

Hierarchy Levels

+ Add Row

Department	Level	Approver Role	Resolved From	Status
Nursing	1	Supervisor	Employee supervisor	Active
Nursing	2	Head of Department	DEPARTMENT_HEAD	Active
Nursing	3	Director Nursing	Named employee	Active
Pharmacy	1	Head of Department	DEPARTMENT_HEAD	Active
Pharmacy	2	Department Manager	DEPARTMENT_MANAGER	Active

6. Jobs, Notifications and Security

- **Job `HRD.JOB\_PROBATION\_EVAL\_QUEUE` (DBMS_SCHEDULER):**
 - Runs daily at 02:00 and calls P_GENERATE_EVAL_QUEUE.
 - A failed run is logged and IT support is alerted.
- **Notification e-mails:**
 - Sent for: evaluation assigned, pending approval, returned, and forwarded to HR.
 - They go through the existing **alerts** framework (the standard SKMCH mail method): new alert rows in HRD.ALERTS / HRD.ALERT_RECIPIENTS, queued and sent by HRD.PKG_HR_ALERTS (P_INS_ALERT_QUEUE / GENRATE_EMAIL_ALERT). The e-mail links to the online form.
- **Authorization schemes:**
 - AUTH_PROB_EVALUATOR;
 - AUTH_PROB_APPROVER (the current approver or acting-for person);
 - AUTH_PROB_HR_USER and AUTH_PROB_HR_ADMIN (security groups, to be confirmed by IT).
- **Data access:** all reads and writes go through the package's role checks. Evidence is visible only to the evaluator, the approvers in the routing path, and HR.
- **Audit:** audit columns on every table, the insert-only history, and no physical delete of evaluations (cancel sets status CN).
- **Privacy:** MRN0 is also the patient MR number. The pages do not join or link to REGISTRATION data.

7. Requirement Coverage

- **FR-001, FR-002, FR-003, FR-004, FR-005, FR-006** (queue generation, duplicates, cancel, exceptions, reassign): DS-01, DS-07, P_GENERATE_EVAL_QUEUE, P_ASSIGN_EVALUATOR, Page G.
- **FR-007, FR-008, FR-009, FR-010** (form, Draft, Submit, lock): DS-01, P_SAVE_DRAFT, P_SUBMIT, Page B.
- **FR-024** (standard criteria rated 1-5): DS-02a, DS-02b, P_SAVE_CRITERIA_RATING, Page B Evaluation Criteria tab.
- **FR-021** (assignments rated 1-5): DS-02, P_SAVE_ASSIGNMENT, score calculation, Page B Assignments tab.
- **FR-022** (assessed training needs): DS-03, P_SAVE_TRAINING_NEED, Page B Training Needs tab.
- **FR-023** (reasons, observations and evidence when not recommended): NON_CONFIRM_REASONS, EMPLOYEE_PROBATION_ATTACHMENT, P_ADD_EVIDENCE, the P_SUBMIT check, Page B Recommendation tab.
- **FR-011, FR-012, FR-013, FR-014** (routing with leave-hierarchy fallback, approve, return, no self-approval): DS-04, DS-05, DS-D10, P_BUILD_ROUTE, F_GET_LEAVE_ROUTE, P_ROUTE, P_APPROVE, P_RETURN, Pages C and D.
- **FR-015, FR-016** (forward to HR, finalize): P_ROUTE (status FH), P_HR_FINALIZE, Pages E and F.

- **FR-017, FR-018, FR-019, FR-020** (status, history, monitoring, overdue): DS-06, P_LOG_STATUS, F_IS_OVERDUE, Page G.
- **NFR-SEC-01, NFR-SEC-02**: authorization schemes, plus role checks inside the package.
- **NFR-AUD-01, NFR-AUD-02**: audit triggers, plus the insert-only history.
- **NFR-PERF-01, NFR-PERF-02**: set-based job SQL, plus indexes.
- **NFR-AVL-01**: the job's date window catches up on missed days. **NFR-AVL-02**: new objects only; no downtime.
- **NFR-DAT-01**: no physical delete. **NFR-DAT-02**: unique index. **NFR-DAT-03**: VERSION_NO with error -20802.
- **NFR-USA-01, NFR-USA-02**: APEX pages in the SKMCH GUI template, plus the "warn on unsaved changes" setting.
- **NFR-CMP-01**: status rules agreed with HR. **NFR-INT-01**: employee data read live from INFORMATION.
- **NFR-OPS-01**: job log and failure alert. **NFR-OPS-02**: non-blocking notification e-mails.

8. Change Inventory and Deployment

- **Scripts, run in this order** (no downtime):

Step	Script	What it does
0	CR-2026-XXX-PEV_00_precheck.sql	Checks that no HRD_PROBATION_% objects exist, and backs up the PKG_PENDING_TASKS source
1	CR-2026-XXX-PEV_01_ddl.sql	Sequences, 9 new tables, indexes, triggers (provided)
2	CR-2026-XXX-PEV_02_pkg_probation_evaluation.pks/.pkb	New package
3	CR-2026-XXX-PEV_03_pkg_pending_tasks.pkb	Adds P_PROBATION_EVAL_QUEUE
4	CR-2026-XXX-PEV_04_seed.sql	Evaluation criteria (from HR's Excel), probation hierarchies for all departments, the HIS.USER_ASSIGNMENT row, alert rows, and the lead-days setting (default 15)
5	CR-2026-XXX-PEV_05_job.sql	Creates the scheduler job
6	APEX export	Pages B-G, authorization schemes, LOVs

- **After deployment, verify:** all objects are VALID; a manual run of the job creates evaluations and a SUCCESS log row; the inbox shows the task count; on a test record, a Submit with E and no evidence is refused (-20806).
- **Rollback:** CR-2026-XXX-PEV_99_rollback.sql (provided). It does not revert finalized probation records or the evidence rows stored in EMPLOYEE_PROBATION_ATTACHMENT; those are business records.
- **Retest these dependents:**

- readers of EMPLOYEE_PROBATION_HISTORY: PKG_COMMON, PKG_EMPLOYEE_INFO, PKG_EMP_INCENTIVE, PKG_HR_ALERTS, PKG_HR_DOCUMENT_RECORD, PKG_HR_EMPLOYEE_RECORD, LEAVE_AUTOMATION, EMAILS, V_HR_EMP_DOCUMENTS;
- any HR document screen that lists EMPLOYEE_PROBATION_ATTACHMENT;
- leave approval itself (regression only, to confirm it is unaffected, since LEAVE_QUEUE_HIERARCHY and ROLE_AUTHORITY are only read).

9. Risks and Open Questions

- **Risk: probation status written too early.** Mitigation: only P_HR_FINALIZE writes it.
- **Risk: two channels at once.** Alert 001 (Excel form) and S07FRM00362 continue alongside the online form, so supervisors may get both. Brief supervisors to use the online form; HR may retire the old channel later.
- **Risk: stale `MANAGER\_MRNO`.** Mitigation: HR exception list and a data-quality report.
- **Open questions:**
 - **Q-05 (HR):** the evaluation criteria list. HR will share it in Excel; it will be loaded through the seed script.
 - **Q-27 (IT):** the security groups for the HR User / HR Administrator roles, and the DOCUMENT_TYPE_ID to use for evidence.
- **Answered in v0.4:** Q-07 (return goes back to the returning approver), Q-08 (extension = new history row, status 'E'), Q-16 (all departments), Q-24 (keep alert 001 / S07FRM00362), Q-29 (generic leave hierarchy), Q-30 (the chain varies), mail method = alerts.
